## PROFILE

**Senior web developer** with 6+ years of experience, with a vast know-how in the development, integration and business implementation of tailor-made web based applications such as websites, CMS, CRM, and other information systems.

**Highly skilled in translating to code** any design for frontend or backend web applications, on multiple devices. Able to create the user experiences and workflow, using a rigorous approach of the latest standards of HTML and CSS rules and SEO practices, applying various design patterns, such as MVC structures, responsive grids, bootstrapping, templating, frameworks and plugins.

**Always seeking to adapt** to new agile development methodologies and frameworks. Open to challenges and complex projects, with excellent analytic and problem solving skills.

**Good verbal and written communication skills.** Able to work, interact and coordinate nimbly as a team to find the most viable solutions in terms of resources and time. Manage, plan and estimate a project development cycle in order act quickly to make decisions under pressure and meet goals and demands.

**Passionate in building** inspiring, sophisticated, functional and secure applications that are at the stat of the art of web technology, which result in intuitive and appealing products for the end user.

## LOOKING FOR

**Integrate an organized, social and fun work environment** with well-defined objectives and methodologies, with freedom and responsibility.  
**Develop exceptional web applications** and be able to push my skills and capabilities to the next level.
